# PROJECT OVERVIEW

# Project Overview

## SRC and One Network, A Blue Yonder Company

SRC is implementing a Transportation Management Solution (TMS) with One Network / Blue Yonder to enhance their logistics operations, focusing on domestic shipments in the USA, Mexico, and Canada. They aim to improve transportation execution, financials, and visibility for Truck Load (TL), Less than Truck Load (LTL), and Parcel models.

## Why have you been invited?

As a valued partner with SRC, your organization can:

- **Tender and Confirm Shipments**: Participate in the tendering process and confirm shipments through integration or the user interface.

- **Monitor Shipments**: Deliver real-time shipment status updates using the ONE Driver app or user interface.

- **Automate Invoicing**: Automatically create and submit invoices for approval based on contractual agreements.

- **Integrate Systems**: Employ standard EDI/APIs for smooth data exchange.

- **Enhance Collaboration**: Improve communication and coordination with SRC Logistics.

- **Access Training**: Obtain training and support for effective utilization of the system..

## SRC's Goal

Enable carrier partners to make ***better decisions... faster*** with:

- Improved Visibility

- Efficiency

- Collaboration

- Financial Accuracy

- Integration

- Growth Potential

... will **create value for all partners**.
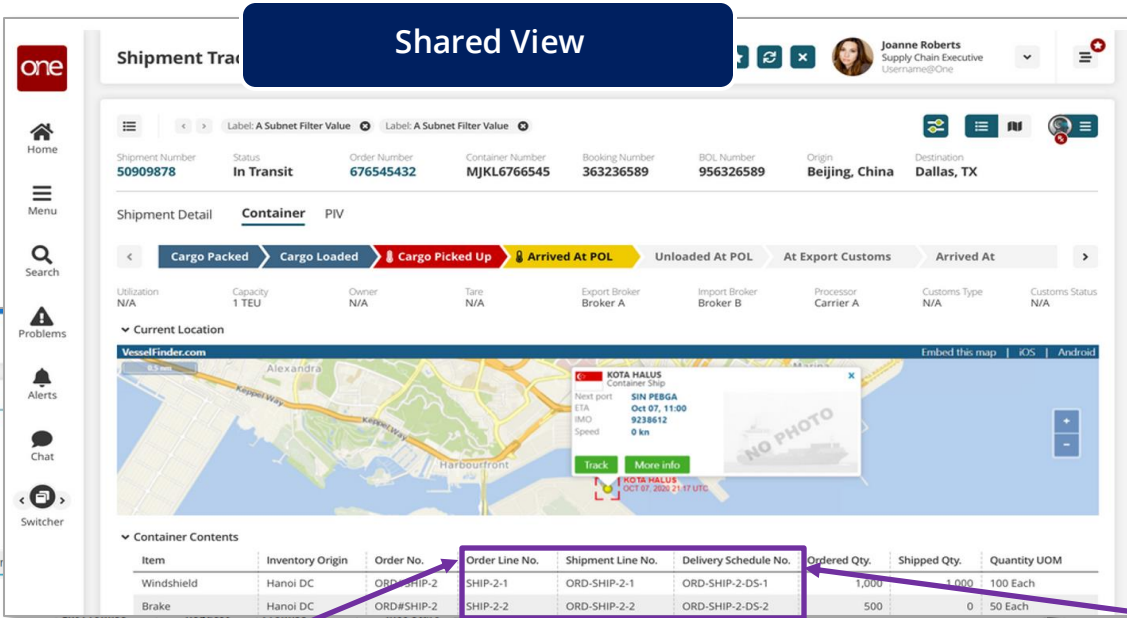

**Our approach:**

- Connecting all partners and their systems through a Digital Supply Chain Network™
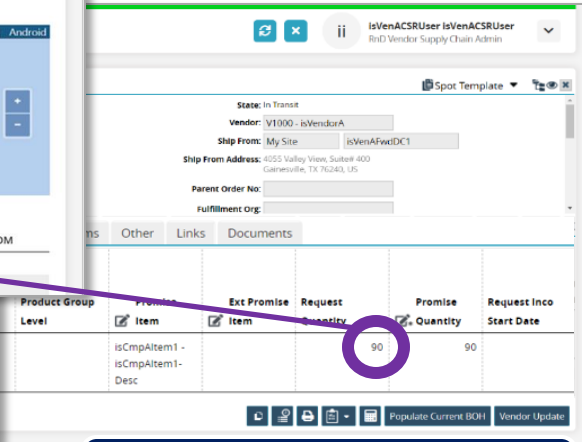

one
A Blue Yonder Company

# One Network: Digital Supply Chain Network

Shared View

Order View from Buyer
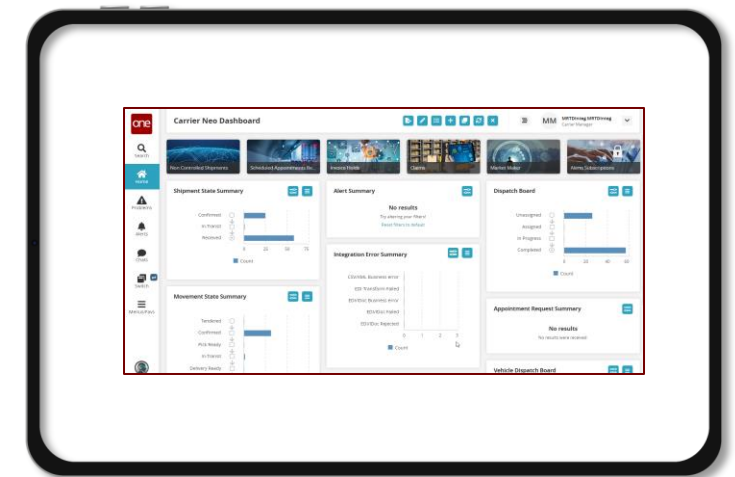

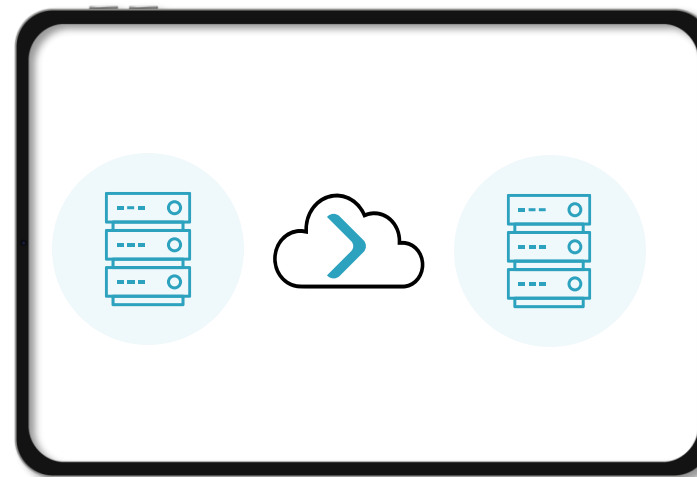

Order View from Client

Shipment View from Carrier

**A "shared system" considerably reduces problem identification and resolution cycles and eliminates numerous manual and repetitive activities.**

# PROJECT SCOPE

# What will change?

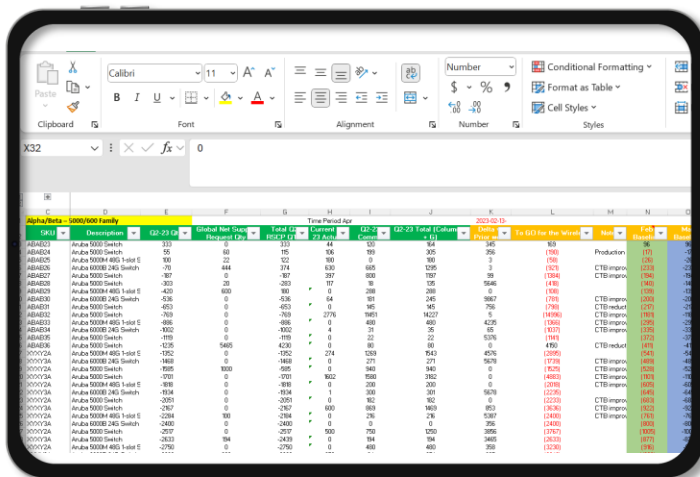

## 01 Invoice Automation

**How you share data**

No more invoices through email

.

## 02 To Integration

**Role for IT**

Data sharing using an Interface Spec

API/EDI Integration

Build Plan sharing

## 03 And Visibility

**Modern platform**

Invoice collaboration

Reporting

Visibility to contracts
